BY ANCHOR INDUSTRIES

## The Aurora sailclothtent

The sailcloth tent is characterised by its translucent white roof and is inspired by the sail-making industry of old, where the centre poles can be compared to the centre masts of a sailing ship.

The translucent roof of the sailcloth ensures that the sunlight is softened into a pleasantly warm light and also provides shade, making it feel as if you are staying under the trees.

In the evening, the roof fabric gives off a pleasantly warm glow, guaranteeing a joyful and festive atmosphere.

The sailcloth tent is nothing of everything and something of everything at the same time. The tent is large and grand, but without compromising on cosiness. It is light in structure and yet extremely sturdy. It attracts attention in all areas, but still remains somewhat modest.

LOOPS

WEATHERSHIELD  
(KEDER)

## Quality and Innovation

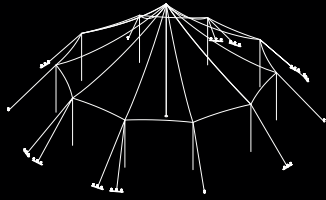

The roof fabric is made of vinyl with a thickness of 440 g/m<sup>2</sup>, which makes the fabric extremely sturdy, without compromising manageability when setting up. The tarpaulins can still easily be carried by hand. They are all M2 / B1 European fire retardant certified.

The loops to attach the sidewalls have been replaced by Weathershield, an innovative keder system that has a large number of advantages. Firstly, it ensures that no wind or water can penetrate between the roof fabric and the side walls. Both are seamlessly connected. In addition, the keder system speeds up the erection of the tent considerably. The side wall is simply slid into the keder profile on the roof tarpaulin and that's it. No need to waste time fiddling with loops. All side walls can be rolled up and fastened to the tent with a simple click system at the top so that guests can easily enter and exit the tent.

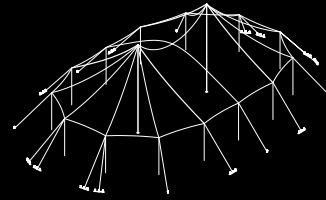

The sidewalls are made of either translucent or transparent vinyl. The tent is fully supported by stylish wooden poles that create a natural look and feel. The clearance of the tent is 2.40 metres. This height guarantees easy passage at all times, even when the sidewalls are rolled up.

**10 meter series:** 10 x 10 m, 10 x 16 m, 10 x 22 m, 10 x 28 m, 10 x 34 m & 10 x 40 m

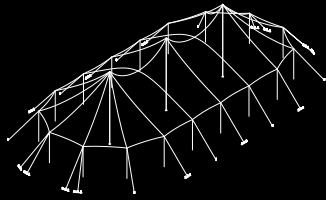

**14 meter series:** 14 x 14 m, 14 x 20 m, 14 x 26 m, 14 x 32 m, 14 x 38 m & 14 x 44 m
